

SHIVA AVINASH SIRIPURAM

Backend Software Development Engineer (Golang)

avinashsiripuram792@gmail.com • +91 8555062539 • Hyderabad, TS 500089 • [linkedin.com/in/avinashf792](https://www.linkedin.com/in/avinashf792)

PROFESSIONAL SUMMARY

Results-driven Backend Engineer with 3 years of experience designing and building scalable RESTful services and distributed backend systems in Go (Golang) for high-volume fintech workflows. Proven track record of engineering high-throughput services processing 10,000+ transactions per minute at 99.9% uptime, strong grounding in data structures, algorithms, and system design, and hands-on experience with SQL, NoSQL, CI/CD, and Agile delivery. Focused on translating complex business requirements into resilient, well-tested, production-grade systems.

EXPERIENCE

Software Development Engineer (SDE1) — Backend (Go)

Jul 2024 – Present

IMPAR Fintech Software Solutions India Private Limited · Hyderabad, IN

- Engineered highly available, scalable REST-based publish services in Go to manage complex 12-scheme workflows across 3 client-specific configurations, leveraging a rule engine to sustain over 10,000 transactions per minute.
- Designed and implemented highly configurable internal microservices tailored to entity-specific needs, integrating them into broader workflow architectures and ensuring system resilience under load with 99.9% uptime.
- Built multiple critical connectivity services for Mambu core-banking integration, delivering reusable, pre-built modules that strengthened client partnerships and cut integration time by 30%.
- Authored reusable Go libraries and internal tooling that accelerated feature delivery, reducing time-to-market and improving overall development velocity by 20%.
- Mentored junior developers on Go best practices, clean API design, and debugging strategies, fostering a culture of code quality and knowledge sharing.

Web Development Intern

Jul 2023 – Jun 2024

IMPAR Fintech Software Solutions India Private Limited · Hyderabad, IN

- Built a full-stack self-service portal backend using Django and Python, with efficient paginated data retrieval that cut data retrieval time by 40%.
- Designed relational data models and REST endpoints powering personalized user dashboards and server-side form validation, contributing to a 15% uplift in feature adoption.
- Partnered with frontend engineers to optimize API response times, contributing to a 25% improvement in page load and search performance.

PROJECT

Real-Time Transaction Ledger & Rule Engine (Go)

Personal Project

Key Skills: Go · REST APIs · PostgreSQL · Redis · Docker · Kafka · gRPC

- Architected a high-throughput transaction processing service in Go simulating fintech publish workflows, using a pluggable rule engine to route transactions across configurable client schemes.
- Implemented an event-driven pipeline with Kafka for asynchronous ingestion and Redis for idempotency and rate-limiting, sustaining thousands of simulated transactions per minute under load testing.
- Designed normalized PostgreSQL schemas with connection pooling, containerized all services with Docker, and exposed internal gRPC alongside public REST endpoints with structured logging for observability.

SKILLS

Languages & Core: Go (Golang), Python, JavaScript, Data Structures & Algorithms, Object-Oriented Programming (OOP)

Backend & APIs: RESTful Services & API Design, gRPC, Microservices Architecture, API Gateway (foundational), Serverless Computing (foundational)

Data & Storage: SQL, NoSQL, Database Design, Redis, PostgreSQL

Architecture & Systems: Distributed Systems, System Design, Scalability, Event-Driven Architecture (Kafka)

Tools & Practices: Git, Docker, CI/CD Pipelines, Agile Methodologies, Problem-Solving

EDUCATION

Bachelor of Technology, Computer Science and Engineering

Jul 2024

VNR Vignana Jyothi Institute of Engineering and Technology · GPA: 9.08/10

CERTIFICATIONS

Golang Software Engineer (Verified) — HackerRank (Apr 2026)

REST API Integration Specialist — HackerRank (Apr 2026)

SQL (Advanced) Database Architecture — HackerRank (Apr 2026)
